Demand for industrial space has slowed notably in recent quarters, which has helped to drive Boston's vacancy rate up from last year's historic low. Still, at 5.2%, the market remains tight and available space is at a premium.

Availability will expand significantly this year, however, with a record-setting 6.8 million SF of new supply expected to deliver by year-end. Amazon's 3.8 million-SF Osgood Landing represents more than half, but about 2 million SF of space underway is likely to come on line fully available. Market vacancy, in turn, could hit 6% by year-end.

This widening gap between supply and demand is supported by recent trends in leasing activity, which remains solid but is down from prior-year levels. Around 4.2 million SF of space was leased in the first half of 2023, 30% below the average pace from 2020-2022. Submarkets clustered along Route 495 South, Route 128 South, and Route 128 North have captured the lion's share of leasing activity year to date.

Of course, these are also among the more active areas for development, which is concentrated in more peripheral submarkets. While limited availability of land in closer-in submarkets is a key element, developers are also faced with increasingly unfriendly city governments, with large industrial facilities unwelcome in many municipalities.

As in most markets, demand for logistics space has been the primary driver of activity in recent years, but Boston's industrial market has far less distribution and warehouse space than most top markets and the U.S. overall. Logistics space here represents less than half of the total inventory, while nationally, the share sits around 70%. The share of flex space in Boston, meanwhile, is substantial, representing nearly 30% of total space, compared to a national average of just 10%, mainly reflecting the area's sizable life sciences sector.

Manufacturing is an important driver as well, particularly advanced manufacturing – clean tech, biotech, and robotics. Here again, Boston's unparalleled strength in life sciences is key, along with the area's robust knowledge-based economy. Suburban submarkets capture the bulk of activity, with life sciences facilities generally located within an hour of Kendall Square.

As in other sectors, the sharp rise in interest rates is clearly reflected in industrial investment trends, with transaction activity consistently declining since 22Q2. Around \$1 billion in assets traded in the first half of 2023, a five-year low. And activity was concentrated in 23Q1, with sales volume down another 50% in 23Q2. Conversations with lenders indicate a willingness to supply financing, but ratios (loan-to-value or loan-to-cost) are shrinking, and there is a heavy preference for established sponsors with longer-term hold periods.

Leasing activity is normalizing in the Boston industrial market, returning to pre-pandemic averages after a flurry of activity in 2020 and 2021. Around 4.2 million SF of space was leased in the first half of 2023, down almost 30% from the average pace set between 2020 and 2022, but in line with pre-pandemic levels.

Submarkets clustered along Route 128 South, Route 128 North, and Route 495 South have captured the lion's share of leasing activity so far this year, with the top lease signed in the Route 3 South Submarket. In March, sporting goods manufacturer Acushnet signed a sublease for the 555,695-SF property at 175 Kenneth Welch Dr., in Lakeville. The space is the former home to Talbots' only distribution center, which the retailer announced it would shutter in May 2022.

Flex inventory, and subsequently leasing activity, is concentrated in the submarkets along the Route 128 West corridor, representing a notable 57% of total industrial space. While leases in this sector tend to be far smaller, a flex property captured one of the largest over the past year. In December, AstraZeneca leased 187,500 SF of space at 35 Gatehouse Drive, in the Lexington/Arlington Submarket, occupying the space the following month.

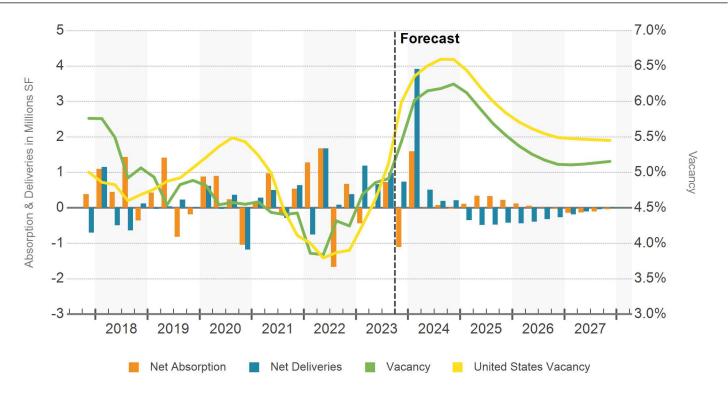

Several notable flex leases have been signed this year

as well. In Braintree, The First Electronics Corporation leased 57,200 SF at 400 Wood Rd. The 2021 delivery is now fully leased, with Integra LifeSciences occupying 99,000 SF. And in March, Rosario Cabinets leased 45.200 SF at 56 Lowland St. in Holliston. The local, highend cabinet maker occupied the space in April at an asking rent of \$10/SF.

Highlighting the area's expanding robotics sector, a locally-based global supplier of warehouse robots signed a significant lease in June. Locus Robotics leased the 158,000-SF property at 100 Fordham Road, just a few miles from the firm's global headquarters in Wilmington. Locus plans to occupy the space upon completion in September. Greater Boston is home to many warehouse robot manufacturers, including Amazon Robotics, 6 River Systems, Symbotic, and Vecna Robotics.

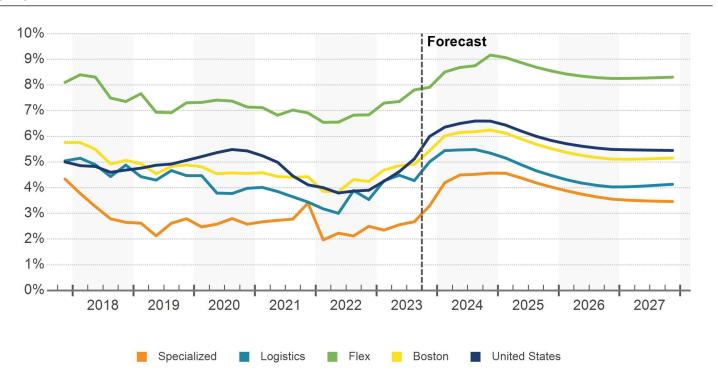

While up from last year's historic low, Boston's industrial market remains relatively tight, with a current vacancy rate of 5.2%. Vacancy in the logistics sector sits below the overall market, at 4.6%, but is up more than 100 bps year over year. Vacancy has also trended higher in the flex segment, although at 7.9%, it still sits below longerterm averages. Specialized industrial, which largely consists of manufacturing space, is the tightest segment, with vacancy sitting at just 3.0%.

Page 6

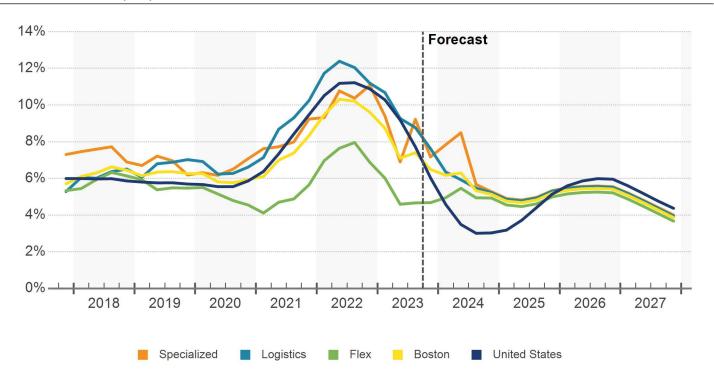

Rents in Boston posted a gain of 6.7% over the past 12 months ending in 23Q2, showing a moderate deceleration from a recent record high and lagging the national average of 6.9%. The biggest boxes have enjoyed the largest gains over the past four quarters. Logistics properties metro wide now average \$13.90/SF after rents increased 8.0% from this point last year. Average rents for specialized properties like cold storage facilities, light manufacturing buildings, etc., are 8.2% higher and now start around \$14.20/SF.

Growth is expected to slow further in coming quarters, which reflects a few different factors. Companies have put a pause on the inventory build, resulting in a drop in import activity and notable decline in demand for

industrial space. The prospect of another recession is also a consideration for industrial tenants, weighing on expansion plans and contributing to a modest level of space give-backs. While the rise in availability should be measured, it will still limit the ability of landlords and property owners to push rents.

While submarkets within Route 128, most notably South Suffolk County, continue to record solid gains in asking rents, more peripheral submarkets, including Route 24 and Route 3 South have joined the list of top performers. Of course there are really no losers at this point, with all but eight submarkets posting rent growth above 6%, and about half seeing gains of more than 7% over the past year.

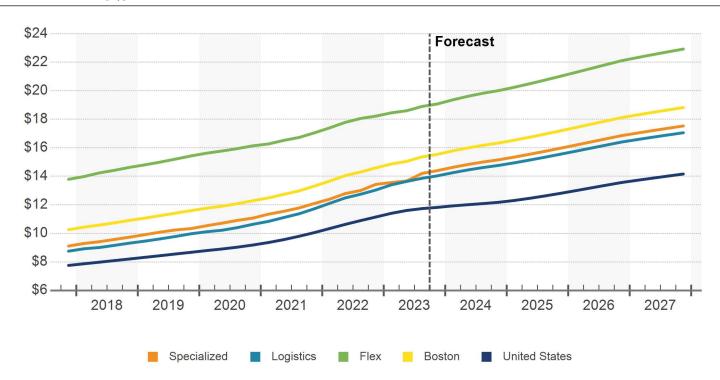

MARKET RENT GROWTH (YOY)

MARKET RENT PER SQUARE FEET

2023 remains on pace for a record-breaking year of new supply, with 1.8 million SF delivering year to date and another 4 million SF expected by year end. Still, Boston distinguishes itself from many other markets by its relatively modest pace of development activity.

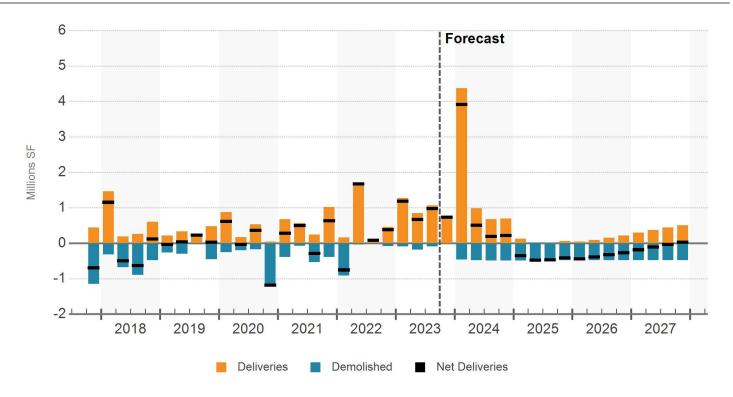

Over the past five years, 10.7 million SF of space has delivered on a gross basis, representing an inventory expansion of just 3%. This compares to 11% nationally, and even higher in some of the most active markets. In Indianapolis, for example, industrial inventory has expanded 24% over the same time period. Demolition activity has further limited supply in Boston, removing more than 20 million SF of space over the past decade.

As in most markets, demand for logistics space is a key driver of development activity in Boston, especially considering the average footprint of warehouse and distribution facilities. With limited availability of land in closer-in submarkets, and more of an anti-development view in many of these communities, developers are increasingly eyeing more peripheral submarkets for new projects.

Among them, Lawrence/Andover has jumped to the top of the list, due to the development of Amazon's 3.8 million-SF Osgood Landing. But more traditional hotspots remain active, including the I-95 Corridor South, which straddles 495, where almost 1 million SF is underway (and 3 million SF has delivered over the past five years), and Route 3 South, where 600,000 SF is under construction (and 1.4 million SF of new space delivered).

Aside from the Amazon property, the largest to enter the market this year was the 662,500-SF spec warehouse in Plainville (I-95 Corridor South Submarket), developed by CRG. Located to the west of I-95 and just a few minutes south of 495, the property delivered in January and remained fully available as of August. Also consistent with recent patterns of activity, a large property came on line in the Route 3 South Submarket. Developed by ARCO on a spec basis, the 219,000-SF distribution facility at 900 Bedford St. in Bridgewater delivered in May.

With debt costs climbing and the banking industry buckling down, investment in Boston's industrial market has continued to decelerate. Volume dropped for the fourth quarter in a row in 23Q2, and the \$476 million in confirmed transactions was the lowest quarterly total in six years. Average cap rates are trending higher, and in some cases, the median confirmed cap rate was over 8% for the first time since 2016.

The sale of warehouse in Newfields, New Hamsphire provides one example. O'Neil Warehouse Company, LLC sold the 1960s-era warehouse at 16 Swamscott St. for \$5.95 million, or \$44/SF. The 116,000-SF building and 2.82-acre lot near Rockingham closed at an 8.84% cap rate, with the strike price equaling a 13% discount to the initial listed price.

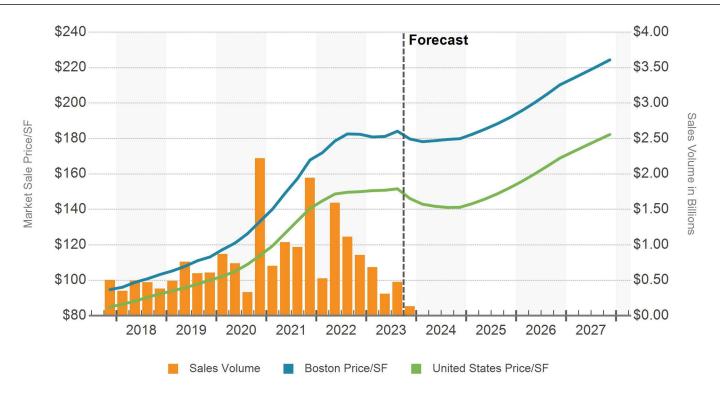

Still, industrial assets are trading more than office, retail, and multifamily recently, and the lack of broad concern about supply-demand imbalance is a plus in this relatively affordable second-tier industrial market. And as economic headwinds mount, firms continue to leverage Boston's hot industrial market to execute sale-leasebacks to access capital.

The year's largest trade to date was Lincoln Property Company's acquisition of an 815,324-SF warehouse at 64 Leona Drive in Middleboro for \$105 million, or \$129/SF. The property was leased back to Handil Holdings LLC, owner of New England holiday staple Christmas Tree Shops. Handil has been in the process of rebranding the former Bed, Bath & Beyond offshoot, and future stores will go by CTS.

Another sale-leaseback transaction closed early in 23Q3. Spirit Realty Capital acquired the 117,000-SF distribution facility at 40-44 Sturtevant St. in Dorchester from Keystone Capital for \$26.8 million (\$229/SF). The property is fully occupied by Dutch Maid Bakery, a subsidiary of Keystone Capital.

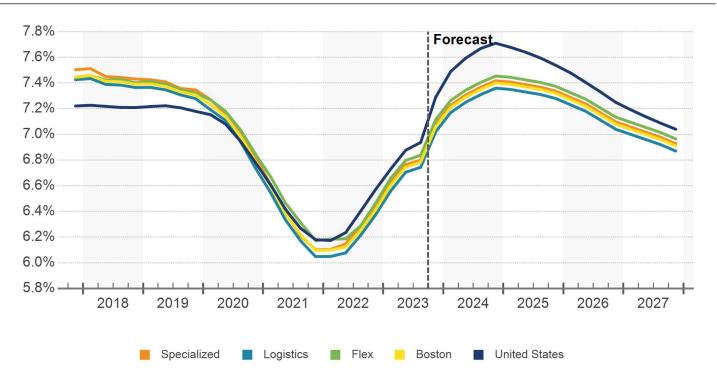

Later in July, a six-property portfolio trade provided a substantial boost to transaction activity. Marcus Partners sold the portfolio, which totaled 1.1 million SF, to Westbook Partners for \$167 million (\$149/SF). All but one of the properties were fully leased at the time of sale.

While Boston's economy was relatively slow to recover from the pandemic and ensuing recession, the pace of job growth is improving, and now outpacing the national average. Over the past year, 79,000 jobs were added, representing a gain of 2.8%. Around 15% of the metro's jobs were lost in the first months of the pandemic, and it took more than 2.5 years to recover these losses. Employment is now 2.5% above February 2020 levels, in line with the U.S. overall.

According to Oxford Economics, Boston's economy will continue to outperform, driven by several key industry concentrations. Professional and business services accounts for nearly 20% of total employment, due largely to the area's outsized scientific research and development community. Top R & D employers include Sanofi, Takeda, Moderna, and Vertex Pharmaceuticals.

Biotech firms, and other knowledge-based employers, are drawn to Boston's top-tier universities, the deep pool of talent and research that they produce, and the affiliated teaching hospitals. This concentration is clearly reflected in employment stats, with education and health

services representing 21% of total jobs compared to a national average of 16%.

The list of top employers is a long one, with Mass General Brigham, Beth Israel Lahey Health, Tufts Medicine, and Dana-Farber Cancer Institute among the more notable health systems. In addition to Harvard and MIT, large employers in the private education space include Boston University, Northeastern, and Tufts.

Employment in the financial activities sector represents about 7% of total area employment, compared to 6% nationally. Fidelity, Mass Mutual, and John Hancock are some of the largest employers in this industry sector.

While Boston's exposure to manufacturing comes in below the U.S. average, the area has a notable advanced manufacturing presence, again related to the renowned academic and research community. Aerospace and defense firm Raytheon moved its headquarters from Massachusetts to Northern Virginia last year, but is still one of Boston's largest employers, with about 12,000 employees across multiple suburban facilities.
