KEY PERFORMANCE INDICATORS

SUMMARY

Office investment sales activity has shifted into slow motion in 2023, just two years after a record \$12.7 billion traded hands. Sales activity reached a high point in late 2021 and early 2022, just before the Federal Reserve initiated its sequence of rate hikes. This policy change precipitated an 84% downturn in transaction volume in the 12 months ending in the third quarter of 2023. The decline was less drastic compared with the pre-COVID era, but transactions were still 71% lower than they were during the less-frothy period from 2015-2019.

Fewer transactions and smaller deal sizes have contributed to the sharp pullback in activity. Since the beginning of the year, 11 office assets with a sticker price exceeding \$10 million have exchanged hands. Notably, life science assets dominated this roster of completed deals. Only five traditional office properties have sold above the \$10 million threshold so far in 2023, a figure that is in stark contrast to the 64 such office trades that occurred during the first nine months of 2021.

Excluding medical office buildings, the median-priced office property traded around \$575/SF between 2019 and the Fed's initial rate hike in early 2022. By the end of September 2023, the median price per square foot was 46% lower, near \$315/SF. This pricing level was last seen during 2013-2015, when the office market had only just regained momentum following the Great Recession.

Recent transfers of assets have largely gone in one direction, with institutional investors and public companies selling to private investors, owner-occupiers and niche sector buyers. For example, TPG Real Estate Partners' Alloy Properties has been an active buyer of R&D properties that can be converted to best-in-class facilities for life science use. On the other side, Alexandria Real Estate Equities has been a net seller, disposing of eight assets across four separate transactions in 2023.

Institutional buyers have not been entirely absent, however. In November, Norges Bank Investement Management acquired a stake in Boston Properties' two-building lab portfolio at 290 and 300 Binney St. in Cambridge at an average valuation of about \$2,000 per SF. This is only slightly off recent peak pricing for labs, underscoring the value of this specialty property type when leased long-term to quality tenants. Formerly an office location for Biogen, 300 Binney will serve as lab space for The Broad Institute when its conversion is complete. Meanwhile, 290 Binney has been fully leased by AstraZeneca, which will take occupancy in 2025 after construction completes.

Apart from labs and the few stabilized single-tenant office deals where future income is supported with

contractual rent increases, recent office deals appear to be heavily driven by their discounts from peak pricing and/or the building's replacement cost. For multi-tenant office assets where future income is uncertain, currently active buyers are putting less weight on their going-in yields and instead prioritizing "price per pound" and increasingly higher unlevered internal rates of return.

A recent example of this heavy discounting is Synergy Boston's acquisition of 1 Liberty Square from Clarion Partners in September 2023. The 13-story, 157,467-square-foot mid-rise in the financial district traded at a 7% discount to where the asset was sold in 2001. At a price of \$45 million, or \$286/SF, this recent transaction also marks a 17% decline from Clarion's 2013 acquisition at \$345/SF.

An exception to this trend of discounted values was the October sale of 855 Bolyston to Ezdan Holding Group, an investment firm based in Qatar. The fully-leased 4 Star property in the Back Bay traded for just under \$100 million, nearly \$700 per SF and more than double the price from its last sale 23 years ago.

As 2024 draws closer, Boston's troubled office market may continue to see well-heeled, low-leverage investors buying up discounted assets with an eye toward life science or medical office conversion. With a rich presence of academic institutions and a solid base in the national life science landscape, the region should remain a breeding ground for technological innovation that will be a future catalyst for growth despite what looks to be a temporary slowdown in venture capital investment into the sector. But in the meantime, intensive capital requirements could limit what buyers will be willing to pay for office properties, even for promising repositionings.
