A resilient consumer base and an ongoing dearth of new supply is keeping retail availabilities near record lows in Boston, mirroring the same trend seen nationwide. Renewed hopes for an economic soft landing and the lowest level of annual construction starts on record mean that the outlook for the next year is for more of the same.

According to Oxford Economics, retail sales excluding automobiles advanced by an estimated 1.4% in the Boston metro area during 2023, again in line with the national average. This was a little over twice the estimated population growth rate of 0.6%, which turned positive after two years of mild pandemic-driven urban outmigration. Moreover, it was enough to keep demand for retail space firmly in positive territory, if somewhat below the level that was customary during the 2010s.

One factor limiting the growth of demand was the limited availability of appropriate supply for retailers that might otherwise have expanded. This, too, is a national phenomenon. The amount of retail space per capita declined in 2023 to 54.3 SF across the 45 largest markets in the U.S., down almost 4% since 2009. Boston has even less retail space per person, at 50.6 SF, which is one reason the local retail market has stayed even tighter than the national one for more than a decade. The availability rate in Boston is currently a mere 3.1% , well below the historically low national figure of 4.8% .

The general economic mood is cautiously optimistic in

early 2024. The job market remains strong despite slowing employment growth. The Federal Reserve's surprisingly dovish December comments on the future path of interest rates signaled that inflation may not be quite the worry that it has been in recent months. Many economists have backed off their earlier forecasts for a recession in favor of the "soft landing" scenario. This all bodes well for consumption and, therefore, for retailers.

Those retailers in Boston will largely need to make do with the space they have, at least in the near term. The construction pipeline is smaller than it has been since early 2011, and with starts in 2023 at only 10% of the 15-year average, it will only shrink in the months ahead.

This should bolster retail rents in Boston, which stagnated at the end of 2023 despite the tightness of the occupancy market. This was driven by a decline of about \$1/SF in rents at the metro area's malls, which have struggled to find their post-pandemic footing amidst longer-term changes in shopper preferences related to e-commerce, convenience, and a desire for experiences. More recently, an inflation-induced shift toward discount retailers, which have been growing steadily in Boston as elsewhere, has likely also been a factor in slower rents. Looking ahead, however, rents look set to keep pace with now-lower inflation as demand and supply both hold steady.

### KEY INDICATORS

Boston's retail market remained historically tight in 2023, with move-ins hampered by creeping supply growth. With recession fears fading and a constricted construction pipeline, the Base Case outlook for the year ahead is for more of the same.

Underlying demand remained solid, if unspectacular, in 2023. New leasing volume was 3.4 million SF, exceeding its 10-year average of 3 million SF and nearly matching 2022. But only a little over half a million SF of new deliveries—up from less than 300,000 SF in 2022 but well below the 2010s average of 1.1 million SF—left retailers with few options outside of vacated space that did not always suit their needs. The result was an availability rate near 3% that barely budged all year, staying very close to its all-time low.

On the net, tenants occupied an additional 1 million SF in 2023, an increase of nearly 60% from 2022, but still 40% below the long-run average from the 2010s. This tracks with the national trend of store openings exceeding store closings in 2023, albeit to a lesser extent than in the prior year.

Discounters topped the list of move-ins by square footage. Ocean State Job Lot absorbed 325,000 SF in 2023, the largest for any single retailer in the metro area. Target and Burlington were next, with the latter occupying a couple of former Bed Bath & Beyond locations. With consumers adjusting their spending in response to higher prices, such retailers have been well-positioned to gain wallet share, especially in the suburbs.

Quick-serve retailers were also prominent expanders

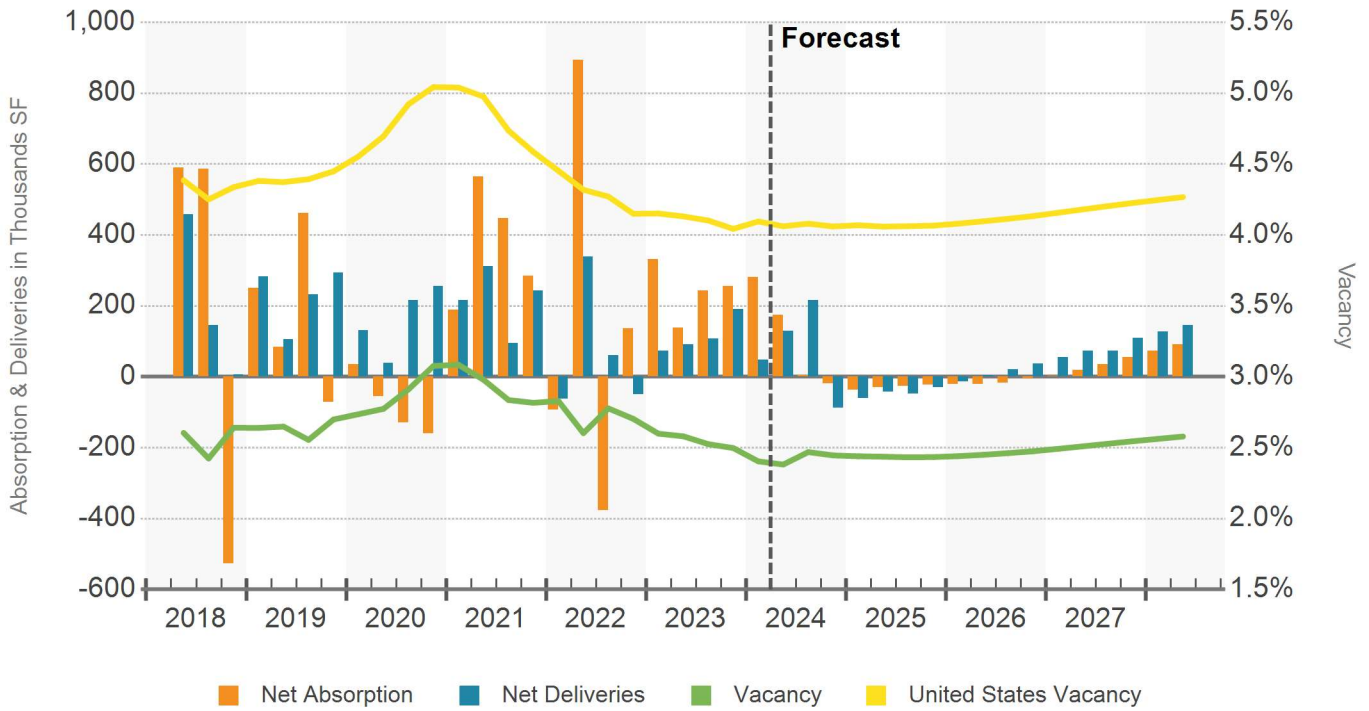

during the previous year, led in location count by Dunkin', Starbucks, Aroma Joe's, and Tatte Bakery & Café, which collectively satisfy New Englanders' love of coffee shops at nearly every price point.

The lion's share of Boston's retail occupancy growth in 2023 occurred in its two largest segments. Tenants occupied a net new 549,000 SF, comprising 0.3% of inventory at freestanding general retail buildings. At neighborhood centers, they took up 388,000 SF, about 0.75% of inventory.

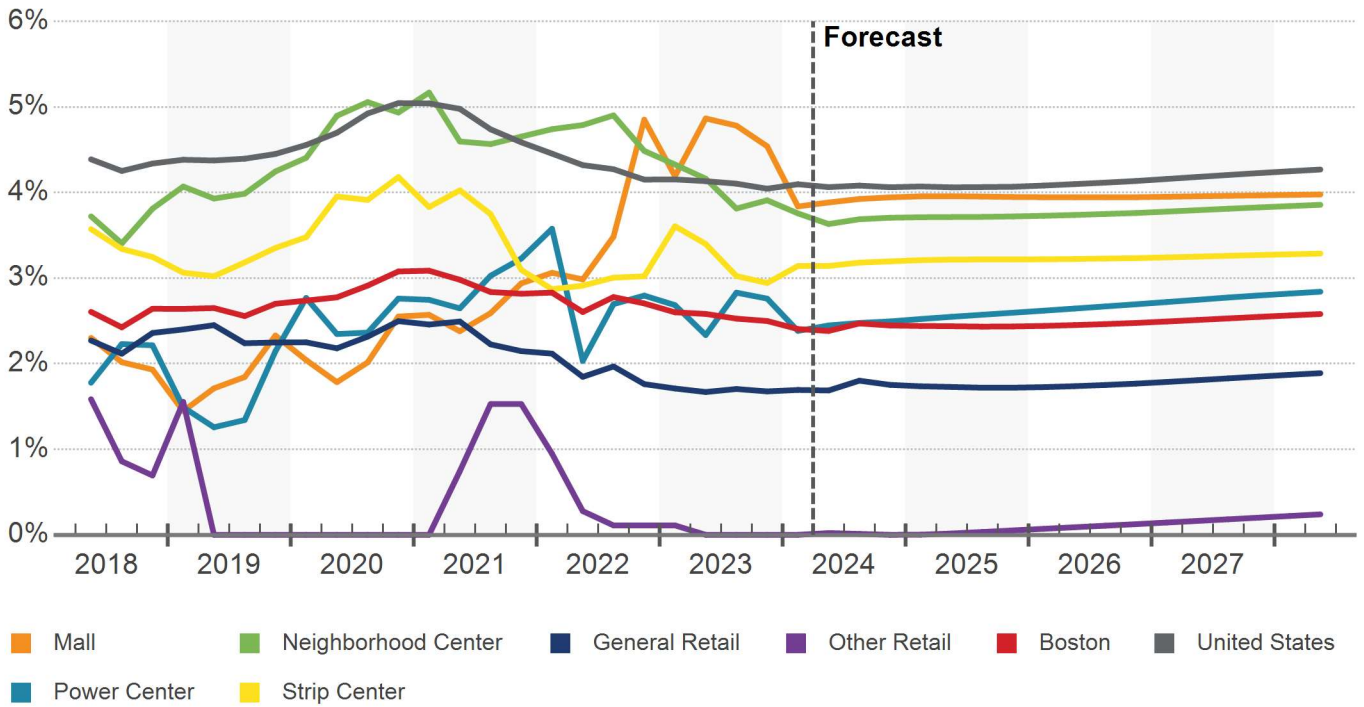

As has been the case for most of the past 15 years, the suburbs saw consistently positive demand. The more volatile CBD, which represents less than 5% of the metro area's retail stock, struggled to keep up. Urban submarkets outside downtown may have been the most intriguing areas. Collectively, they have seen occupancy increase by just over 2% since 2020, exceeding the 1.2% growth in the suburbs and the 0.4% in the CBD. The urban Roxbury/Dorchester Submarket, for example, saw more net move-ins in 2023 than the CBD's traditional retail powerhouse of the Back Bay.

With a resilient job market buoying consumer spending and inflation gradually slowing, the consensus among economists is that a recession is no longer imminent. Prices remain high, and consumer debt loads are climbing, a combination that is likely to lead to an ongoing preference for discount retailers. But with little new supply to speak of, it is difficult to see what could alter the fundamental balance of Boston's retail occupancy market in the near term.

\*Renewal

Retail rents held flat in 2023, though the reason seems to have more to do with consumers reacting to still-high prices than with space market supply and demand. Average retail rents are currently around \$27.00/SF and holding steady after advancing nearly \$2 in two years since early 2021. The pattern of slowing rents in Boston is an exaggeration of the national trend. Retail rents in the U.S. at large grew at 3.3% in 2023, down meaningfully from 4.4% in 2022, but not nearly so much as in Boston.

The mall sector drove weak rent performance in Boston, with mall rents declining by 3.5% in 2023, from just under \$42/SF to a little over \$40/SF. Two notable exceptions to the trend were Allston's Arsenal Yards and Somerville's Assembly Row, both vibrant urban shopping centers developed within the past few years that managed to maintain positive rent growth.

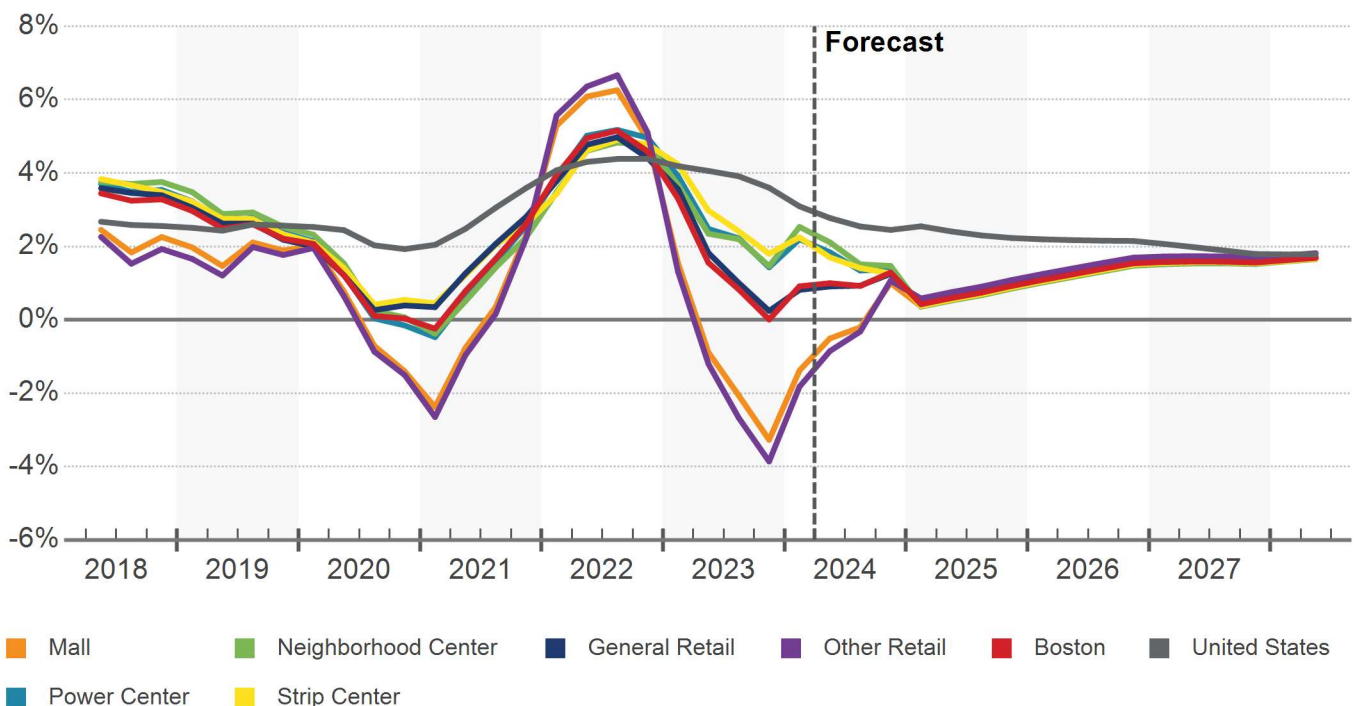

Outside of the mall segment, the overarching theme in 2023 was the comparative underperformance of CBD and urban retail as compared to properties in the suburbs. Properties at non-mall shopping centers in the suburbs saw rents increase by about 2% in 2023, while similar CBD and urban properties experienced a decline in rents of approximately 3%.

A similar pattern emerged in the freestanding general segment, about three-quarters of which is located in the suburbs. Rents grew by about 1% at suburban general retail properties but fell by nearly 2% at properties in urban areas.

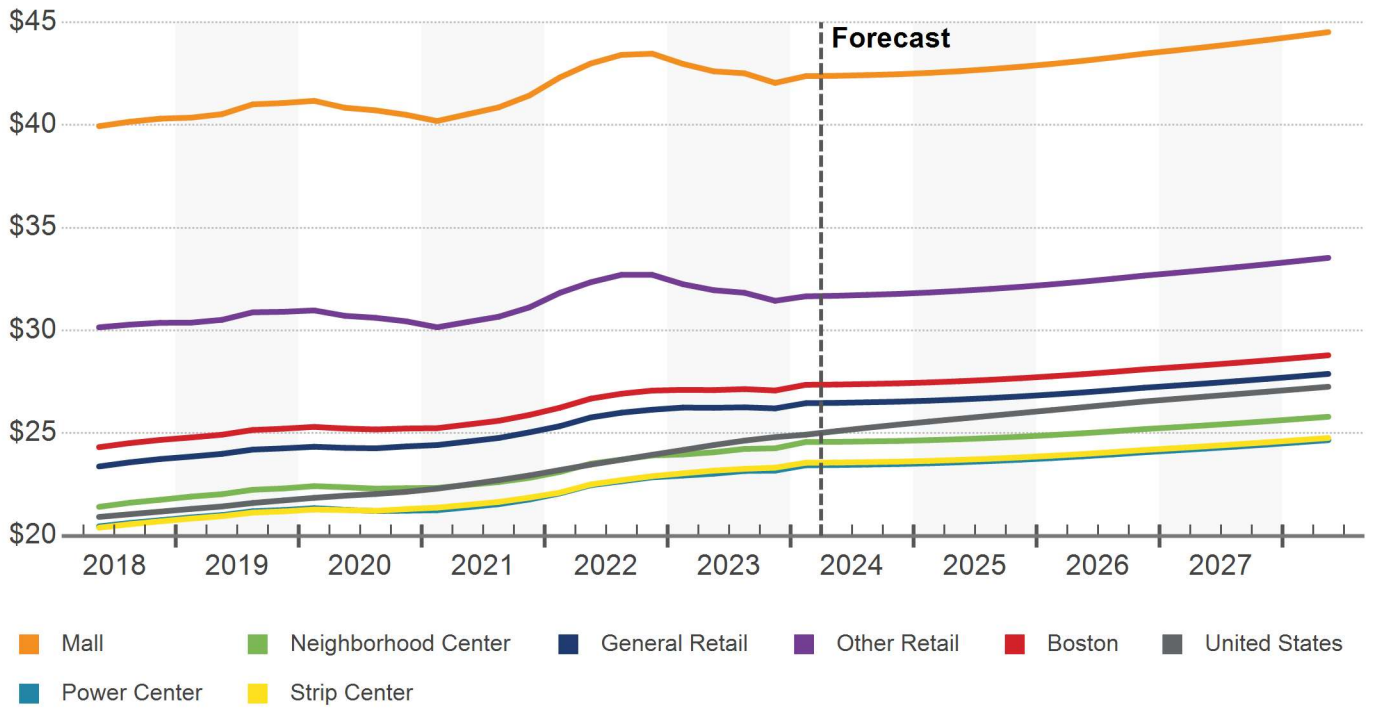

Overall, three of the four submarkets where rents fell the most in 2023 were the CBD areas of the Financial District, the Seaport, and the Back Bay, each of which saw rents fall by at least 3%. By contrast, the strongest rent growth in the Boston Market, 3.5%, occurred in the Strafford County and Route 3 South submarkets, on the extreme northern and southern ends of the metro area, respectively.

Except for the mall segment, where vacancy has been trending upward in Boston and nationally since the mid-2010s, the outlook for rents in 2024 is for growth to stabilize in positive territory early in the year. Even malls are expected to see rents start growing by the end of 2024 as operators in the segment continue to adjust the mix of retailers toward what consumers want in a shopping center experience. With occupancy extremely tight, negligible new supply on the horizon, and fears of near-term recession waning, rents would appear to have nowhere to go but up.

### MARKET ASKING RENT GROWTH (YOY)

MARKET ASKING RENT PER SQUARE FEET

The retail supply pipeline, already comparatively small in Boston, shrunk to a historically low level in 2023. With starts also lower than in any previous year on record, it can only shrink further in the near future.

Less than 525,000 SF of new retail inventory delivered in 2023, only 0.25% of inventory and easily the lowest amount since tracking began in 2006. Demolitions were also at an all-time low at under 70,000 SF, likely due to an uncertain financing environment that has stalled development and redevelopment plans across commercial property sectors.

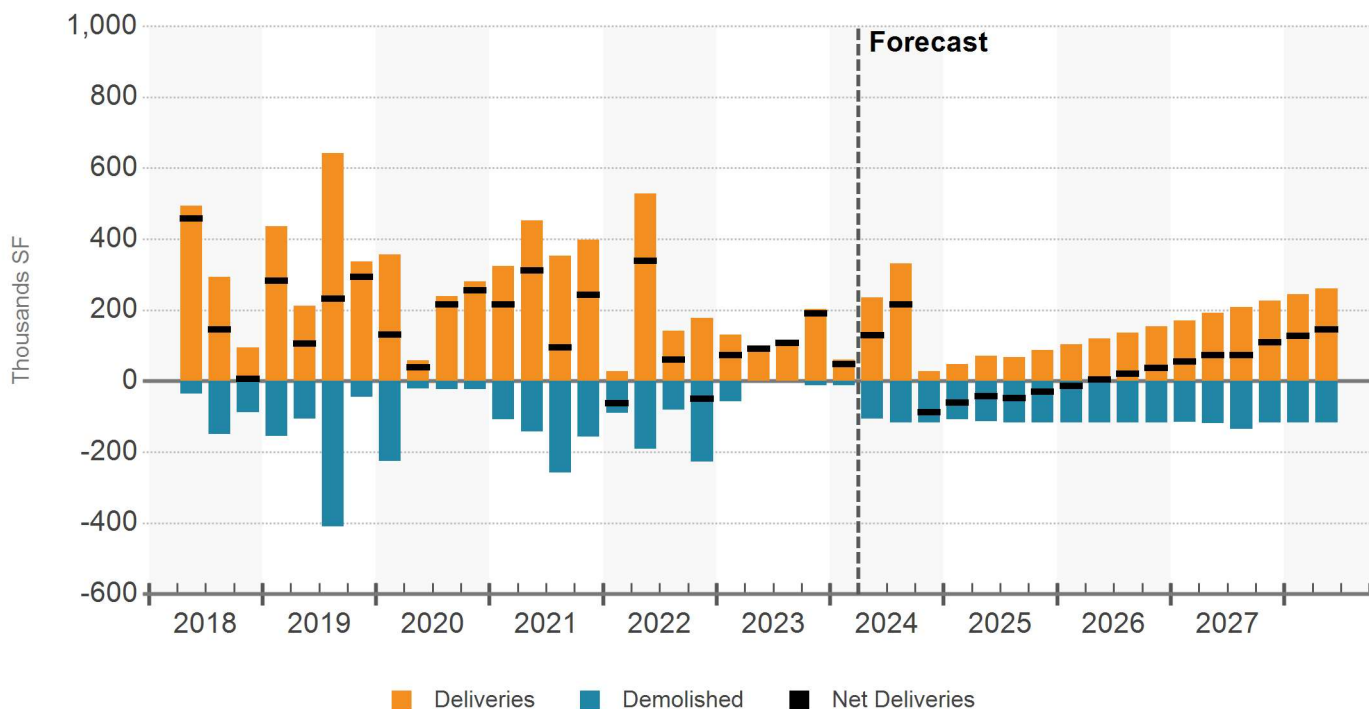

Two individual properties comprised over a third of this activity. The first, a 97,000-SF storefront in South Boston, delivered in February. The second, a 110,000-SF retail component of a planned residential community in the south-shore suburb of Scituate, completed construction in December. Beyond these, new deliveries were limited to a smattering of smaller service stations, restaurants, and banks, mostly in the suburbs. Outside of

the micro markets in which they reside, they represented too little space to have a meaningful impact on operating fundamentals.

There is currently only 660,000 SF under construction, the lowest amount since the beginning of 2011. More than a third of this is in the northern suburb of Rockingham, including a speculative 137,120-SF truck stop development at Highway 101, slated for delivery in the summer of 2024.

The retreat of the 10-year treasury yield in response to the Federal Reserve's dovish December comments could signal a loosening of financial conditions that could, in turn, produce more construction activity. Even so, Boston's retail supply has historically grown slowly, with net deliveries below 1% of inventory in every year since 2009—and in most years, less than 0.5%. Barring a general economic downturn, this should help keep the occupancy market tight and keep rental growth at or above inflation in the years ahead.

Retail investment sales volume in Boston came back to earth in 2023 after averaging nearly \$3 billion in both 2021 and 2022. This pattern reflects the national trend of receding transaction volume after two years of record-high investment sales, though it is not as pronounced in Boston. The final total for the year is expected to be more than \$2 billion in the market, approximately 25% above the 2015-2019 annual average. By contrast, national sales volume looks set to close the year somewhere around \$50 billion, well below the five-year pre-pandemic average of \$66 billion.

An environment of higher interest rates surely contributed to the slowdown, though many retail investment transactions tend to be less dependent on debt than others in commercial real estate. Part of this is due to the high volume of smaller, less-expensive properties that are bought and sold among more localized investors. In the past two years, 55% of retail properties sold in Boston were smaller than 5,000 SF and over two-thirds were valued at less than \$2 million.

The market is not without large-scale transactions, however. One of the largest in recent times was the \$319 million sale of 17 total buildings comprising 2 large shopping centers. Two national owners—seller SITE Centers and buyer Urban Edge Properties—closed the transaction in October 2023 for an average of \$228/SF.

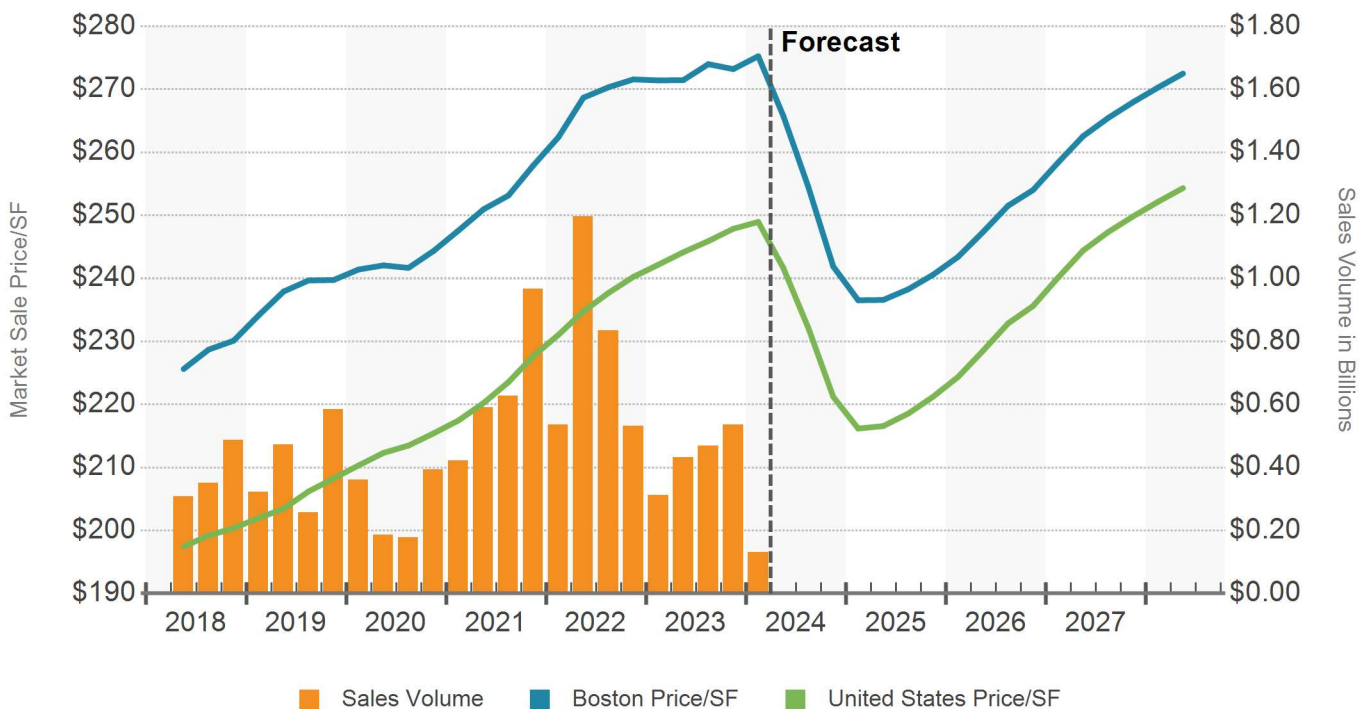

Included in the sale were Gateway Center, an urban power center in Everett, and the Shoppers World Regional Mall in Framingham.

Earlier in the year, the foreign investment group EG America sold a portfolio of 415 convenience stores to Realty Income Corporation for \$1.5 billion. The 49 properties in the Boston area, nearly all of which are in the suburbs, averaged about 4,000 SF and were collectively valued at \$73 million, or approximately \$365/SF.

Deals like these have pushed average pricing in Boston to a nominal all-time high of \$280/SF, about \$20 above the national average. In inflation-adjusted terms, however, local values are down nearly 6% from their peak in early 2020, about twice the decline in real values nationally.

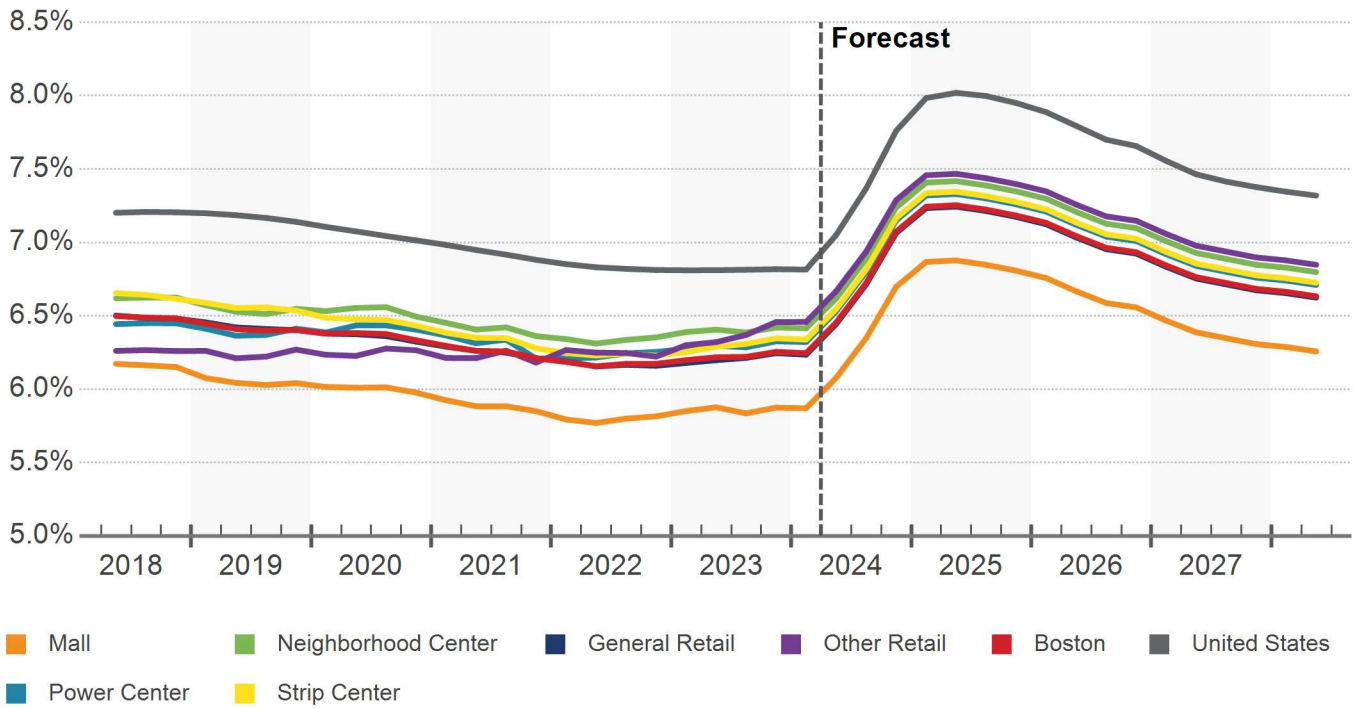

The Base Case forecast calls for a general increase in cap rates of 100-110 basis points over the next 18 months as yields adjust to higher interest rates—even if, as expected, those rates fall somewhat over the same period. With the occupancy market tight, this cap rate expansion is the primary component in the forecast's expectation of a 15% decrease in retail property values before they reset in mid-2025.

Boston's economy has experienced faster growth than the overall U.S. economy for several years, driven by a highly educated workforce that supports the metro area's knowledge-oriented industries.

According to the Census Bureau's American Community Survey 2022, over 51% of adults in Boston aged 25 or older hold at least a bachelor's degree, and nearly 24% hold a graduate or professional degree. This makes Boston one of only six metropolitan areas with at least 1 million residents in which most adults have a bachelor's degree and one of only five in which more than a fifth have a graduate degree. Nationally, the percentages are 36.7% and 14.0%, respectively.

Because of this, the local economy is heavily weighted toward organizations operating in information, professional and business services, education and health services, and financial activities. This is evident in the list of the metro's largest employers, including healthcare systems Mass General, Beth Israel, and Dana-Farber; universities Harvard, MIT, Boston University, and Northeastern; and financial giants Fidelity, Mass Mutual, and John Hancock.

Advanced biotechnology research is a particular strength of the local economy, especially in Cambridge, which can lay claim to being the world's leading center for life sciences research and development. AstraZeneca, Moderna, Sanofi, Takeda, and Vertex Pharmaceuticals headline a long list of both established and emerging firms that helped Boston's economy grow by over 116% from 2017-21, compared to about 11% for the U.S.

Despite the relative strength of the Boston economy,

overall employment was hit harder by the pandemic than the nation at large. As of February 2024, total employment in the Boston metro area was still about 1% below where it was four years earlier, while nationally it was 3.6% higher.

Boston is also among the national leaders in cost of living. Local apartment rents currently average over \$2,800/month and are among the nation's highest, trailing only the metro areas in and around New York City and the San Francisco Bay Area. Similarly, house prices are much higher than the national average. According to the National Association of Realtors, the median sale price of an existing home in the Boston metro area was \$714,000 at the end of 2023, 81% above the national mark of \$394,600. This figure placed Boston near the top among markets on the East Coast.

Residents have enjoyed some small relative respite in inflation, however. From January 2021 to January 2024, consumer prices rose a total of 15% in Boston, lower than the 18% rise that occurred nationally.

More broadly, Boston has endured less pronounced outmigration than other gateway markets and has avoided some of the rise in social problems that coincided with the pandemic, though opioid abuse is a glaring counterexample. Per capita overdose deaths in Massachusetts were 13.5% higher than the national average in 2021.

Looking ahead, the presence of vital industries, a capable labor force, and a generally high, if expensive, quality of life position Boston well for strong economic performance relative to the nation and peer markets.
